10 Large-10 cent Packages of Flower Seed for 50cents

SNAPDRAGON

PETUNIA

Among the choicest flowers scattered throughout the world are some whose lives are short; they sprout from seed, grow, flower, produce their seed, and die all within the limit of our garden year. These are annuals and the more blooms we pluck the more they bloom. This is their great charm. They can be depended upon to make a good display of bloom the first year. I am offering these choice flower seed, extraordinary quality at less than half price. I have chosen the flowers most easily grown, most beautiful and most popular varieties. You will love them, their cheerful blossoms will keep you happy all summer long. You may order more than one collection if you wish.

FLOWER SEED LIST

Descriptions of these Marvelous Flowers

ASTERS, SUNSHINE—Annual. This is an improved Anemone Flowered Aster of great beauty; all the flowers have a cushion-like center of tiny quills of a contrasting color which adds to their decorative value—there are many shades of pink and blue, also white in the seed we offer which may be depended upon to supply the most-attractive Asters for cutting; their delicate beauty is hard to describe, the flowers are borne on long stiff stems and last a long time in water.

CHINESE FORGET-ME-NOT—Annual. A lovely plant 18 to 24 inches tall with flowers of a true Forget-Me-Not blue. It is a hardy annual of recent introduction from China; will thrive in warm weather better than the ordinary Forget-Me-Not. It is ideal for bedding as well as for cut flowers.

SNAPDRAGON, GIANT FLOWERED MIXTURE—Annual. For a gorgeous coloring few flowers can match Snapdragons. Antirrhinum or Snapdragons are now receiving the attention they deserve. They are undoubtedly one of the best cut flowers which can readily be grown from seed, while for beds or borders they are a constant source of pleasure, being in flower all the time. This superb mixture contains the tall, giant flowering sorts.

LARKSPUR, NEW GIANT HYACINTH FLOWERED MIXTURE—Annual. 18 to 30 inches. These are among the best-known garden flowers, and in recent years a vast improvement has been effected by careful selection in size and color of the blossoms and the general habit of the plant. They make handsome beds or lines, and their free, graceful habit and bright colors are very effective when interspersed in the old-fashioned flower or shrubbery border. Seed sown in the open ground before the close of April will produce flowering plants by the beginning of

July, and give a continuous succession of flowers from then until frost, a record that is not surpassed by any other annual.

PETUNIA, KUNDERD'S GIANT RUFFLED MIXTURE—Annual. These flowers cannot be equaled by any other plant for outdoor decoration. They will flower the first season, even if sown in the open ground, but usually not before June. The Ruffled Giants have flowers of extraordinary size and substance, and are distinguished from the large flowering ringed section by deep fluting, giving the appearance as if artificially ruffled.

PHLOX, KUNDERD'S SPECIAL MIXTURE — Annual. The annual Phloxes are dazzling in effect, particularly so when sown in masses or ribbon beds of contrasting colors. Few flowers are so easy to grow from seed, so pretty and compact in habit, so quick to bloom, or give such a brilliant display of color.

REGAL LILY (Lillium Regale)—Perennial. This wonderful, new, hardy lily was discovered in China by the late Mr. E. H. Wilson of the Arnold Arboretum, Boston. It has a very delightful fragrance. It grows to a height of from two to five feet with 3 to 12 and more massive blooms open at a time. Color a beautiful white with delicate, canary-yellow throat and a pinkish tint on the outside of the petals. It blooms in July and increases rapidly both from seed and bulb offsets. It is easy to grow from seed and will bloom the second year.

SCABIOSA, KUNDERD'S SPECIAL MIXTURE — Annual. Twelve to eighteen inches. This is an old favorite, and of late years has been greatly improved. The flowers are borne on long, wiry stems, in many beautiful colors. An exceptional garden plant and indispensable for cutting. Sow out-doors in May. Keep the seed-pods clipped and the plants will bloom much longer.

SWEET PEAS, KUNDERD'S PREMIER MIXTURE OF SPENCERS—Annual. No garden is too small for a row of sweet peas. Its blooming season usually extends from early summer until very hot, dry weather and no other climber equals it for cutting, either for use in bouquets or for table decorations. Nothing within recent years can approach in importance the introduction of the "Spencer, Butterfly or Orchid Flowered" sweet peas. They are distinguished from the standard sorts by the enormous flowers with crinkled and wavy petals, and also from the fact that they usually bear four blossoms on a long stout stem. This mixture is made up from the named varieties and great care has been given in preparing this mixture, so that each packet will contain a balance proportion of color.

ZINNIAS, KUNDERD'S COLOSSAL DAHLIA FLOWERED MIXTURE—Annual. The Zinnia is one of the most brilliant, showy and satisfactory of annuals, and has long been a general favorite, and is now enjoying a wide popularity not only for garden decoration but also for cutting. The Colossal Dahlia Flowered are perhaps the largest, often measuring from 5 to 6 inches in diameter. The colors are simply exquisite. Planted out-doors in May they will give flowers until frost.
